Dear Josh,

In "Man and His Future" published by Ciba a long time ago, in 1963, you have made some comments and some opinions have been attributed to you. I am planning to write something on this subject and I wonder whether you still hold these opinions. The opinions mentioned are: (1) Beginning at the bottom of page 275, with the remainder of the paragraph on page 276; (2) on page 288 and 289. As you know, there is as much divergence of views on this subject now as there was in 1963, and before that.

Yours sincerely,

Alfred
